March 5-6, 2003, San Diego, California

Luis A. Troche

Climate Protection Partnerships Division

Energy Supply and Industry Branch

Outline

- Brief overview and update on CHP Partnership
 - goals
 - mechanisms
 - status
- Purpose of workshop
 - information exchange
 - constructive feedback

EPA's CHP Partnership - Basics

- Voluntary partnership with Governments, Institutions, Industry, NGO's
- Goal: get CHP projects installed
- Why: double efficiency, reduce emissions, improve energy security and independence, improve power reliability and quality, lower energy costs
- How: direct project assistance, education, outreach, regulatory support, market development, public recognition, networking

EPA's CHP Partnership - Status

- Launched 18 months ago with 18 Founding Partners
- Now 85 Partners, including:
 - Industrial, commercial, and institutional
 - Project developers, consultants, equipment manufacturers, law firms, financiers
 - Gas and electric utilities
 - State, city, and local governments
- Key agencies/groups: DOE, FEMP, HUD, USCHPA, Regional CHP Initiatives
- Have assisted about 20 CHP projects

EPA's CHP Partnership - 2003 Plan

- Key Sectors
 - Industrial, Commercial, Institutional, District Energy
- Key Regions
 - NE, MW, SE, TX
 - Direct assistance in any Region
 - Foundation work in other Regions
- Approach
 - Identify large economic potential, market, engage partners, pursue projects

Why Are We Here

- Facilitate open information exchange between our partners and our regulatory counterparts
 - Latest regulatory developments and experience
 - Upcoming regulatory developments
 - Latest technologies, applications, and environmental performance
- Exchange constructive feedback and questions
- Promote efficiency that leads to environmental benefits
